Management Plan
Rossell

The Rossell property is located along Bailey's Mill Road, directly across from Firehouse No. 2. The cross street is Brooke Drive North. The property is a 4.29 acre wooded lot, acquired in 2000 (including the 1.14 acre adjoining Lakeshore property acquired and merged with Rossell in 2002) which was and is completely overgrown. Primrose Brook runs through the property. Public access is available by parallel parking along Bailey's Mill Road.

Goal

The goal for the Rossell property is to maintain the property as a wooded lot.

Method to Achieve Goal

The property will be walked annually to assure that no obstructions to Primrose Brook exist. If obstructions of Primrose Brook are noted they will be cleared. Trees bordering Bailey's Mill Road will be examined and if they create a danger to the public they will be trimmed or removed. If Japanese knotweed is identified on the property eradication efforts will be undertaken including using herbicide and mechanical means of control.

No other maintenance on this property is contemplated.
